PROFILE

As a self-taught Web developer, I have developed a passion to create visually appealing, user-friendly, and adaptive websites. Strong problem-solving skills and ability to carry out personal projects on time. Highly motivated and interested in learning about current trends and web development technologies.

PROJECTS

E-commerce ⬈
Shophub App
- I create this e-commerce project to target an online shop where clients can browse, select and buy products or services.
- I optimize the design and make a user-friendly and attractive interface for the online store, where customers can easily navigate through the products, search for items, add them to the cart
- **Tech Stack :** React.js | React-Redux | Tailwind CSS | HTML | SCSS

Movie App ⬈
Movix
- I build this movie software based on the TMDB API, including search, slider, and Infinity scrolling features.
- The purpose of this film application is to provide you with the correct information about all films.
- **Tech Stack :** Next.js | scss | Tailwind CSS

Code-Editor ⬈
Code-Pen
- I build this code-editor for web developers to practice HTML, CSS, and JavaScript
- This easy-to-use code editor has a simple design.
- **Tech Stack :** React.js | CSS | code-mirror

SKILLS

HTML & CSS   **React.js**   **JavaScript**   **Next.js**   **Redux**   **GitHub**

Tailwind CSS   **Problem solving**   **Team work**   **Communication**
